- Your User Guide — Updated in real-time
- Available when and where you need it
- Touchscreen convenience
- Customizable interface
- Maintenance schedules and information
- Multilingual
- Comprehensive icon & symbol glossary

# 6.7L DIESEL

## DIESEL ENGINE

### Odor

Diesel equipped vehicles are equipped with a DPF (diesel particulate filter) in the exhaust system. This filter is a self-cleaning catalyst referred to as regeneration. Regeneration will occur at various mileages depending on drive cycle, weather, and altitude. During regeneration, exhaust temperatures can reach 1,112°F (600°C) in the DPF. During the first few regenerations, you will notice a burning odor or something smelling hot, this is normal and please continue to drive the vehicle. If at any time the engine light is on, please visit an authorized dealer.

## **Noise**

Diesel engines can create noises that may seem as a concern. The nature of a diesel engine is compression ignition where compressed air and fuel are mixed and ignited. Weather, Barometric Pressure, Altitude, and Temperature will affect how fuel is ignited in the engine. Engine's will sound different from day to day or previous model years. Clicking, ticking, or light knocking is normal and will change from day to day and as the engine breaks in, this is normal. Clicking sound from under the hood shortly after vehicle shutdown is normal as actuators such as the EGR valve are cycled. Diesel equipped vehicles also have an exhaust after treatment system to reduce emissions utilizing a DPF (addressed in Odor category) and an Selective Reduction Catalyst (SCR). The SCR reduces NOx using the Diesel Exhaust Fluid (DEF) system. DEF is injected directly into the SCR through a dosing module. This process will create a clicking sound and at times, will make noise even with the vehicle shut off. This is normal as the DEF dosing module is purging DEF. If at any time the check engine light is on, please visit an authorized dealer.

## **Fluid Leaks**

Diesel engines and new vehicles use assembly / anti-corrosive lube to assure the correct assembly torque on fasteners and prevent corrosion. You may notice areas that may appear damp as a fluid leak but is typically residual assembly lube, this is normal. Dealers make every effort to remove residual fluids during vehicle pre-inspection. If at any time fluid is found dripping on the ground, please visit an authorized dealer. If at any time the check engine light is on, please visit an authorized dealer.

## **Engine Idle**

Diesel engines are equipped with variable idle speed. Periodically your engine can idle as high as 1100 rpm while in Park (P). This is normal for engine warm up and emissions. During this high idle mode, the engine will sound different, this is normal. The engine will return to low idle if the brake or clutch pedal are depressed. We recommend not pressing either pedal unless you are ready to drive the vehicle as this will

interrupt warm up or emissions strategy. If at any time the check engine light is on, please visit an authorized dealer.

## **Drivability**

Diesel engines are controlled by a PCM (Powertrain Control Module). With state of the art technology and emissions regulations, vehicles may perform differently from one model year to another.

Drivability can also be affected by the following:

- After-treatment regeneration
- Two footed driving (if brake pedal and accelerator are pressed at the same time, you will notice a delay in power).
- Temperature
- Weather
- Wind
- Load
- Altitude
- Gear Ratio

# RAM 2500/3500

These conditions are considered natural events and may not be corrected. If at any time the check engine light is on, please visit an authorized dealer.

## Fuel Economy

Diesel engines offer superb fuel economy under certain conditions. Fuel economy should improve after the vehicle is broke in. Many factors will affect or reduce fuel economy.

- After-treatment Regeneration
- Cold Temperatures
- Wind
- Extended Idling
- Towing
- Short Trips
- Fuel Quality
- City Driving
- Aftermarket Grills

- Oversized Tires
- Gear Ratios

If at any time your check engine light is on, please visit an authorized dealer.

For further information, and applicable warnings and cautions, please refer to the Owner's Manual at [www.mopar.com/en-us/care/owners-manual.html](http://www.mopar.com/en-us/care/owners-manual.html) (U.S. Residents) or [www.owners.mopar.ca](http://www.owners.mopar.ca) (Canadian Residents).

## DIESEL EXHAUST FLUID

Your truck is equipped with a Selective Catalytic Reduction (SCR) exhaust emissions after-treatment system. This technology is used to reduce Nitrogen Oxides (NOx) emissions of the engine so that it meets current U.S. EPA and California exhaust emissions requirements. This system is new to many truck operators and does require some maintenance for proper operation.

In order to function properly and ensure the vehicle meets applicable emissions standards, the SCR system injects Diesel Exhaust Fluid (DEF) into the exhaust upstream of the SCR catalyst. The DEF reacts with the exhaust gas inside the catalyst to convert NOx to harmless gasses prior to release into the atmosphere.

DEF consumption varies with vehicle use and duty cycle in much the same way as diesel fuel. Since it is consumed during operation of the vehicle, the DEF tank must be refilled periodically when indicated by the DEF gauge and warning messages. The blue filler cap is clearly marked "Diesel Exhaust Fluid". On Chassis Cab

trucks, it is located behind the cab on the driver's side of the truck. On Pickup trucks, the blue filler cap is located inside the fuel filler door. When refilling the DEF tank, make sure the fluid used carries the API certification logo for Diesel Exhaust Fluid.

### **Low DEF Warning**

When the DEF level is low, a message stating "Low DEF Refill Soon" will be displayed in the instrument cluster, the "Low DEF Icon" will illuminate, and a chime will sound. Unless DEF is added, a mileage countdown will be indicated with the message "Speed Limited to 5 MPH in 200 Miles - Refill DEF". This message will be updated and displayed at each startup. When the countdown reaches 100 miles (160 km), the message will remain on the display and countdown as the vehicle is driven. Other information can be accessed with the scroll switches on the steering wheel. However, the countdown will return to the display after a short interval. Chimes will sound at various mileage intervals during the countdown to serve as a reminder of the low DEF level. If the countdown reaches zero, indicating the

DEF tank is nearly empty, the message "5 MPH Max Speed on Restart, Long Idle or Refuel - Refill DEF" will be displayed. Add up to 2.5 Gallons (9.5 Liters) of DEF in order to avoid vehicle operation at a maximum speed of 5 mph (8 km/h).

### **Tampering / Incorrect DEF Detection**

In alignment with Clean Air Act (CAA) guidelines, the SCR system will detect conditions which may be due to tampering or incorrect DEF. A string of warning messages will display in the instrument cluster:

- Service DEF System – See Dealer
- 5 MPH Max Speed in 200 mi Service DEF System – See Dealer
- 5 MPH Max Speed on Restart, Long Idle or Refuel – Service DEF System – See Dealer
- 5 MPH Max Speed Service DEF System – See Dealer

A visit to an authorized dealer should be planned as soon as you see one of these messages to correct the issue and to avoid vehicle operation at a maximum speed of 5 mph (8 km/h). Under some

conditions, such as in the case of recurring faults, the countdown may start from a value less than 200 miles (322 km). Only fill the DEF tank with API-certified DEF, other fluids may cause damage to the emissions components.

### **Diesel Fuel Fill:**

Your truck is equipped with a capless diesel fuel filler system. The diesel nozzle must be fully inserted or fill performance will be greatly reduced.

### **Miscellaneous DEF Tips:**

- Never "top-off" the DEF tank after a normal DEF fill.
- Containers and pumps containing iron, brass, aluminum, or non-stainless steel will rapidly corrode if used to store or transfer DEF. The resulting corrosion can damage emissions components.
- If stored at temperatures below 90°F (32°C), DEF has a shelf life of at least one year. However, DEF degrades more rapidly at higher temperatures.

- You may occasionally hear an audible clicking from the DEF system. This is normal operation.
- The sealed bottles and vented fill adapters available from your RAM dealer are designed to ensure proper filling. Non-sealed bottles and/or non-vented fill adapters, may be available from other sources will require special care to avoid overfilling.
- If DEF is spilled, it should be cleaned up with mild soap and water to avoid corrosion or damage to components and finished surfaces. For this reason, transporting DEF in the cab of your truck is not recommended.
- You can receive assistance in locating DEF by calling 1-866-RAM-INFO.

## ADDING DIESEL EXHAUST FLUID (DEF)

The DEF gauge (located in the instrument cluster) will display the level of DEF remaining in the tank.

Completely fill the DEF tank through the diesel exhaust fluid fill location at every maintenance interval, or before if prompted by the instrument cluster display.

The DEF tank on these vehicles is designed with a large amount of full reserve. So, the level sensor will indicate a full reading even before the tank is completely full. To put it another way, there's additional storage capacity in the tank above the Full mark that's not represented in the gauge. You may not see any movement in the reading – even after driving up to 2,000 miles (3,220 km) in some cases.

### NOTE:

- Driving conditions (altitude, vehicle speed, load, etc.) will affect the amount of DEF that is used in your vehicle.
- Another factor is that outside temperature can affect DEF consumption. In cold conditions, 12°F (-11°C) and below, the DEF gauge needle can stay on a fixed position and may not move for extended periods of time. This is a normal function of the system.
- Since DEF will begin to freeze at 12°F (-11°C), your vehicle is equipped with an automatic DEF heating system. This allows the DEF injection system to operate properly at temperatures below 12°F (-11°C). If your vehicle is not in operation for an extended period of time with temperatures below 12°F (-11°C), the DEF in the tank may freeze. If

the tank is overfilled and freezes, it could be damaged. Therefore, do not overfill the DEF tank. Extra care should be taken when filling with portable containers to avoid overfilling. Note the level of the DEF gauge in your instrument cluster. On pickup applications, you may safely add a maximum of 2 gallons (7.5 liters) of DEF from portable containers when your DEF gauge is reading  $\frac{1}{2}$  full. On Chassis Cab applications, a maximum of 2 gallons (7.5 liters) may be added when the DEF gauge is reading  $\frac{3}{4}$  full.

- There is an electric heater inside the DEF tank that automatically works when necessary if the DEF supply does freeze, the truck will operate normally until it thaws.
- Ensure the DEF cap is reinstalled prior to filling vehicle with diesel fuel to avoid spilling diesel fuel into the DEF Filler.

## **AUTOMATIC “SMART” EXHAUST BRAKE – (DIESEL ONLY)**

- Automatic Exhaust Brake technology delivers smoother, less aggressive exhaust braking characteristics during downhill descents. Although it can apply full exhaust braking force if needed, Automatic Exhaust Brake may not apply obvious braking if the vehicle speed is not increasing. Automatic Exhaust Brake is intended to maintain vehicle speed while Full Exhaust Brake is intended to reduce vehicle speed.

- Automatic Exhaust Brake can be enabled by pushing the exhaust brake button again any time after the normal Full Exhaust Brake has been turned on. The “Exhaust Brake Indicator” in the instrument cluster will change from yellow to green when Automatic Exhaust Brake is enabled. Pushing the exhaust brake button again will toggle the exhaust brake mode to off.

## 2500/3500 AIR SUSPENSION SYSTEM

This air suspension system is a rear leveling ride height system. The main purpose of this system is to maintain the truck's rear ride height level. There are two selectable heights that can be chosen based on your operating conditions.

The system requires that the ignition be in ON/RUN position or the engine running with zero vehicle speed for all user requested changes and load leveling.

Alternate Trailer Height Button

**Normal Ride Height (NRH)** – This is the standard position of the suspension and is meant for normal driving. It will automatically adjust to maintain the rear ride height as conditions change.

**Alternate Trailer Height (ATH)** – Lowers the vehicle approximately 1 in. (25 mm) for a level truck, to be used as required while trailer towing. It will automatically adjust to maintain the rear ride height as conditions change.

### NOTE:

- Most 3500 models will not lower to Alternate Trailer Height (ATH) when unloaded.
- Refer to "Trailer Towing" in "Starting And Operating" in your Owner's Manual at [www.mopar.com/en-us/care/owners-manual.html](http://www.mopar.com/en-us/care/owners-manual.html) (U.S. Residents) or [www.owners.mopar.ca](http://www.owners.mopar.ca) (Canadian Residents) for further information.

**Trailer Decoupling/Unloading** - The air suspension system will load level (lower/exhaust only) once after the vehicle has been turned off for 12 minutes. This allows for easy removal of a trailer and/or load from the back of the truck by maintaining the ride height. After 12 minutes you will need to turn the ignition to the run position for the air suspension to re-level due to addition/removal of load in the vehicle. If the air suspension system is disabled using the

settings menu (Tire Jack Mode, Transport Mode, Alignment Mode, or Bed Lowering Mode) the system will remain disabled when the vehicle is turned off. Reactivating the air suspension can be accomplished via the settings menu or driving the vehicle above 5 mph (8 km/h) for Tire Jack Mode or Alignment Mode and 16 mph (26 km/h) for Transport Mode and Bed Lowering Mode.

#### **Ignition OFF Behavior**

For a predetermined amount of time after the ignition is off the air suspension may adjust to maintain a proper appearance.

## **AUXILIARY SWITCHES**

There can be up to five auxiliary switches located in the lower switch bank of the instrument panel, which can all be used to power various electronic devices and PTO (Power Take Off) – if equipped. Connections to the switches are found under the hood in the connectors attached to the auxiliary Power Distribution Center.

The system has the ability to configure the functionality of the auxiliary switches via the Instrument Cluster Display. All switches can now be configured for ignition or battery power, saving or not saving the state across a key cycle, and momentary or latching switch operation.

For further information on using the auxiliary switches, please refer to the Ram Body Builders Guide by accessing [www.rambodybuilder.com](http://www.rambodybuilder.com) and choosing the appropriate links.

For general questions on upfitting commercial vehicles, including:

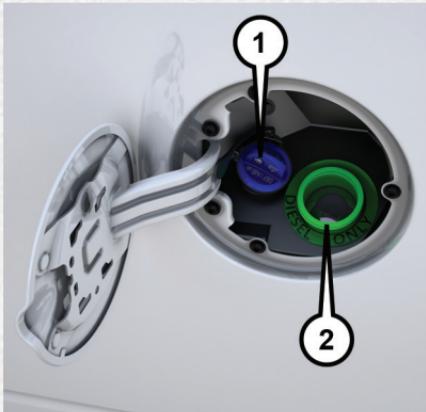

- Loose rear park assist installation
- Programmable auxiliary switches
- PTO (Power Take Off) system
- Wiring diagrams
- Vehicle dimensions
- Snow plow installation
- Weight charts and trailer towing

Please consult the Body Builders Guide at [www.rambodybuilder.com](http://www.rambodybuilder.com).

For further information, and applicable warnings and cautions, please refer to the Owner's Manual at [www.mopar.com/en-us/care/owners-manual.html](http://www.mopar.com/en-us/care/owners-manual.html) (U.S. Residents) or [www.owners.mopar.ca](http://www.owners.mopar.ca) (Canadian Residents).

## ADDING DIESEL FUEL AND DEF

### ADDING DIESEL FUEL AND DIESEL EXHAUST FLUID (DEF)

**Fill Locations**

1 — Diesel Exhaust Fluid (DEF) Fill Location

2 — Diesel Fuel Fill Location

- Ensure appropriate fluid is added to the applicable fill port on the vehicle. The smaller blue capped fill port is for DEF. The cap-less green fill port is for diesel fuel only.
- If DEF or gasoline is accidentally added to the diesel fuel tank, DO NOT START the engine. This will result in severe damage to your engine, which is not covered by your New Vehicle Limited Warranty. Have your RAM towed to an authorized dealer for service.

For further information, and applicable warnings and cautions, please refer to the Diesel Supplement at [www.mopar.com/en-us/care/owners-manual.html](http://www.mopar.com/en-us/care/owners-manual.html) (U.S. Residents) or [www.owners.mopar.ca](http://www.owners.mopar.ca) (Canadian Residents).

## LIGHTS

### AUTOMATIC HIGH BEAM — IF EQUIPPED

The Automatic High Beam system provides increased forward lighting at night by automating high beam control through the use of a digital camera mounted above the inside rear-view mirror. This camera detects vehicle specific light and automatically switches from high beams to low beams until the approaching vehicle is out of view. This feature is programmable through the Uconnect system.

#### NOTE:

For further information, and applicable warnings and cautions, please refer to the Owner's Manual at [www.mopar.com/en-us/care/owners-manual.html](http://www.mopar.com/en-us/care/owners-manual.html) (U.S. Residents) or [www.owners.mopar.ca](http://www.owners.mopar.ca) (Canadian Residents).

## PARKVIEW

## CARGO FEATURES

### PARKVIEW REAR BACK-UP CAMERA

You can see an on-screen image of the rear of your vehicle whenever the transmission is shifted into REVERSE. The ParkView Rear Back-Up Camera image will be displayed on the Uconnect Display, located on the center stack of the instrument panel.

For further information, and applicable warnings and cautions, please refer to the Owner's Manual at [www.mopar.com/en-us/care/owners-manual.html](http://www.mopar.com/en-us/care/owners-manual.html) (U.S. Residents) or [www.owners.mopar.ca](http://www.owners.mopar.ca) (Canadian Residents).

### CARGO LIGHT WITH BED LIGHTS — IF EQUIPPED

- The cargo light and bed lights (if equipped) and trailer spotter lamps (if equipped) are turned on by pushing on the cargo lights button located under the headlight switch.
- If the vehicle's speed is 0 mph (0 km/h), these lights can also be turned on using the switch located just inside the pickup box. A telltale will illuminate in the instrument cluster display when these lights are on. Pushing the switch a second time will turn the lights off.

**Bed Light Switch Without RamBox**

## CARGO CAMERA — IF EQUIPPED

**Bed Light Switch With RamBox**

### NOTE:

The cargo light and bed lights (if equipped) will also turn on for approximately 60 seconds when a key fob unlock button is pushed, as part of the Illuminated Entry feature.

### NOTE:

If the vehicle speed remains below 8 mph (13 km/h), the cargo camera image will be displayed continuously until deactivated by touching the Uconnect display.

- The Cargo Camera is located in the bottom center area of the Center High-Mounted Stop Lamp (CHMSL).

### NOTE:

If snow, ice, mud or any foreign substance builds up on the camera lens, clean the lens, rinse with water and dry with a soft cloth. Do not cover the lens.

**Cargo Camera Display**

## **KEYLESS ENTER-N-GO — PASSIVE ENTRY**

### **INTRODUCTION TO KEYLESS ENTER-N-GO**

The Keyless Enter-N-Go — Passive Entry system is an enhancement to the vehicle's key fob. This feature allows you to lock and unlock the vehicle's door(s) without having to push the key fob lock or unlock buttons as well as starting and stopping the vehicle with the push of a button.

#### **NOTE:**

The key fob may not be found if it is located next to a mobile phone, lap top or other electronic device; these devices may block the key fob's wireless signal.

### **Cargo Camera With Dynamic Centerline (Available With Surround View Camera Only) — If Equipped**

If equipped, the Dynamic Centerline feature provides an overlay on the Cargo Camera display screen that aligns to the center of the pickup box to aid in hooking up a fifth wheel camper or gooseneck trailer.

For further information, and applicable warnings and cautions, please refer to the Owner's Manual at <https://www.mopar.com/en-us/care/owners-manual.html> (U.S. Residents) or [www.owners.mopar.ca](http://www.owners.mopar.ca) (Canadian Residents).

### **BED DIVIDER — IF EQUIPPED**

The bed divider has two functional positions:

- Storage Position – maximizes the bed cargo area when not in use.
- Divider Position – managing your cargo and assisting in keeping cargo from moving around the truck bed.

For further information, and applicable warnings and cautions, please refer to the Owner's Manual at <https://www.mopar.com/en-us/care/owners-manual.html> (U.S. Residents) or [www.owners.mopar.ca](http://www.owners.mopar.ca) (Canadian Residents).

## TO LOCK THE VEHICLE'S DOORS:

With a valid Keyless Enter-N-Go key fob within 5 ft (1.5 m) of the driver or passenger front door handles, push door handle lock button to lock all doors.

Do NOT grab the door handle, when pushing the door handle lock button. This could unlock the door(s).

Push The Button To Lock

Do NOT Grab The Handle When Locking

### NOTE:

- After pushing the door handle lock button, you must wait two seconds before you can lock or unlock the doors, using either Passive Entry door handle. This is done to allow you to check if the vehicle is locked by pulling the door handle without the vehicle reacting and unlocking.
- The Passive Entry system will not operate if the key fob battery is dead.

The vehicle doors can also be locked by using the key fob lock button or the lock button located on the vehicle's interior door panel.

## TO UNLOCK FROM THE DRIVER OR PASSENGER SIDE:

**Grab The Door Handle To Unlock**

With a valid Keyless Enter-N-Go key fob located outside the vehicle and within 5 ft (1.5 m) of the driver or passenger side door handle, grab either front door handle to unlock the door automatically.

For further information, and applicable warnings and cautions, please refer to the Owner's Manual at [www.mopar.com/en-us/care/owners-manual.html](http://www.mopar.com/en-us/care/owners-manual.html) (U.S. Residents) or [www.owners.mopar.ca](http://www.owners.mopar.ca) (Canadian Residents).

## FRONT USB PORT/AUDIO JACK (AUX) PORT

### USB PORT

**Uconnect Media Hub**

- 
- 1 — Standard USB Type A Port
  - 2 — Mini USB (Type C) Port
  - 3 — AUX Jack
- 

This feature allows an iPod or external USB device to be plugged into the USB port. The USB port supports certain iPod and iPhone devices. The USB port also supports playing music from external USB devices. Some iPod software versions may not fully support the USB port features. Please visit Apple's website for

## SIRIUSXM GUARDIAN — IF EQUIPPED

iPod software updates. Connect your iPod or compatible device using a USB cable connected to the USB port. USB memory sticks with audio files can also be used. Then, audio from the device can be played on the vehicle's sound system while providing the artist, track title, and album information on the radio display (if available on device). When connected, the iPod/USB device can be controlled using the radio or steering wheel audio controls to play, skip to the next or previous track, browse, and list the contents.

## AUX/AUDIO JACK

The AUX/audio jack provides a means to connect a portable audio device, such as an MP3 player, to the vehicle's sound system. This requires the use of a 3.5 mm stereo audio patch cable. AUX mode is entered by pushing the Media button. Once in Media mode, select the AUX button when the audio jack is connected. Volume on the connected device may need to be adjusted to optimize audio quality.

## ACTIVATION

Activate your account to enjoy advanced safety, security and convenience features.

1. Press the Apps icon on the bottom of your in-vehicle touchscreen.
2. Select the “Activate Services” icon from your list of apps.
3. Select “Customer Care” to speak with a SiriusXM Guardian Customer Care agent who will activate services in your vehicle, or select “Enter Email” to activate on the web.

Once you have activated your services, you're only a few steps away from using remote services.

**Mobile App**

Download the Uconnect mobile app:

- Once downloaded, use your Owner Account login and password to access the app.
- A PIN is required to execute remote services.
- Tap the “Location” button on the bottom menu bar of the app to locate your vehicle or send a destination to your Uconnect Navigation (if equipped).

- Tap the “Settings” side menu in the upper left corner of the app to bring up app settings and access the Assist Call Centers.

For further information:

- U.S. residents visit: [siriusxm.com/guardian](http://siriusxm.com/guardian)
- Canadian residents visit: [siriusxm.ca/guardian/](http://siriusxm.ca/guardian/)

## FEATURES

### In-Vehicle

SiriusXM Guardian enhances your ownership and driving experience by connecting your vehicle to an operable network. When connected to an operable network, you have access to:

- SOS Call: Connect to a live agent who will contacts emergency services and stay on the line with you until help arrives.

- Customer Care Assistance: Speak with a live agent by pressing the ASSIST button on your rearview mirror to get Roadside Assistance or support.

### Remote Services

- Vehicle Finder helps you find where you parked your car.
- Send & Go allows you to send destinations to your navigation system for easy access on the go.
- Remote Door Lock/Unlock lets you unlock or lock your doors from any distance.
- Remote Horn & Lights allows you to sound your horn and flash your lights to easily find your car.

### Security Services

- Receive text or email notifications if your vehicle's security alarm goes off.
- Receive stolen vehicle assistance, using GPS technology to help authorities locate your vehicle if it is stolen.

SiriusXM Guardian remote services can be used with the Uconnect app from virtually anywhere.

For further information on SiriusXM Guardian or the Uconnect mobile App, refer to your Uconnect Owner's Manual Supplement.

## VEHICLE FINDER AND SEND & GO

### Vehicle Finder

Vehicle Finder allows you to find the location of your vehicle. To find your vehicle:

1. Press the “Location” tab on the Uconnect mobile App bottom bar.
2. Select the “Vehicle” icon to determine the location of your vehicle.
3. Select the “Find Route” button that appears, once your vehicle is located.
4. Select your preferred Navigation app to route a path to your vehicle.

### Send & Go

To send an address to your Uconnect Navigation using the Uconnect mobile app:

1. Press the “Location” tab on the bottom bar of the Uconnect mobile app.
2. Type in the destination you would like to navigate to, or search through one of the categories provided.
3. Select the destination you want to send from the list that appears.
4. Press the “Send To Vehicle” button, and then confirm the destination by pressing “Yes,” to send the destination to the Uconnect Navigation in your vehicle.
5. Finally, confirm the destination inside your vehicle by pressing the “Go Now” option on the pop-up that appears on the touchscreen when the vehicle is started.

## AMAZON ALEXA — IF EQUIPPED

### Amazon Alexa Integration

Alexa is Amazon's cloud-based voice service and it lets you voice-command your Uconnect system from just about anywhere you Alexa.

To link your Uconnect system to Amazon Alexa:

1. Download the Amazon Alexa app on your iPhone or Android.
2. Launch the app, then tap MENU, and go to SKILLS.
3. Search for your vehicle. Then tap “ENABLE.”
4. Select LINK ACCOUNT.
5. Log in using your vehicle's Owner Account ID and password.

Examples of commands:

- “Alexa, ask Dodge Durango how much gas is in my vehicle.”
- “Alexa, ask Jeep Grand Cherokee to send directions to Iron Mountain to my vehicle.”
- “Alexa, ask Chrysler 300 to start my vehicle.”

# ANDROID AUTO AND APPLE CARPLAY — IF EQUIPPED

## ANDROID AUTO INTEGRATION

Android Auto

With easy touchscreen navigation and voice recognition, Android Auto brings useful information and organizes it into simple cards that appear just when they are needed.

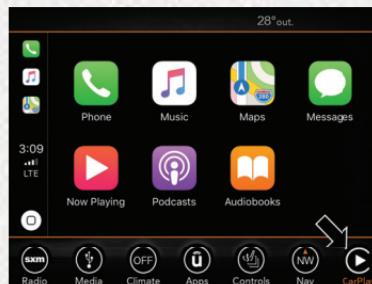

1. Download the Android Auto app from the Google Play store on your Android-powered smartphone.
2. Connect your Android powered smartphone to one of the media USB ports in your

vehicle. If the Android Auto app was not downloaded, it will begin to download when you plug in your device.

3. Once the device is connected and recognized, the “Phone” icon on the personalized menu bar will automatically change to the Android Auto Icon.

## APPLE CARPLAY INTEGRATION

Apple CarPlay is the smarter, safer way to use your iPhone to get directions with Apple Maps, listen to Apple Music, make calls and send messages — all through the Uconnect touchscreen or with your voice through Siri.

Apple CarPlay

To use CarPlay, make sure you are using iPhone 5 or later, have Siri enabled in Settings, ensure your iPhone is unlocked for the very first connection only, and then follow these steps:

1. Connect your iPhone to one of the media USB ports in your vehicle.
2. Once the device is connected and recognized, the “Phone” icon on the personalized menu bar will automatically change to the CarPlay icon.

### NOTE:

**Long Press:** Press and hold the VR button to activate Siri or Google Assistant.

**Short Press:** Briefly tap the VR button to activate the native Uconnect voice recognition system.

When using Android Auto or Apple CarPlay, be sure to use the factory-provided cable that came with your phone, as aftermarket cables may not work.

# RAM TOOL BOX MOBILE APP

## NOTE:

The Owner's Mobile App content is applicable to vehicles sold in the U.S. market and are not available from the Canadian App Store or Google Play Store.

## KEY FEATURES

- Owner Information For Your Vehicle
- Accident Assistant
- Online Service Scheduling
- Roadside Assistance
- Maintenance History
- And More

To get this FREE application, go directly to the App Store or Google Play Store and enter the search keyword "RAM TOOLBOX".

The RAM TOOLBOX Application is the essential app for owners of Ram brand vehicles. The app puts driver and lifestyle information right in the palm of your hand, anywhere you go. Whether it's providing information about specific prod-

uct features, taking a tour through your vehicle's equipment, staying up to date on your vehicle's health, knowing what steps to take following an accident, or scheduling your next appointment, we know you'll find the app an important extension of your Ram vehicle. Simply download the FREE app, select your make and model and enjoy the ride.

## FEATURES/BENEFITS

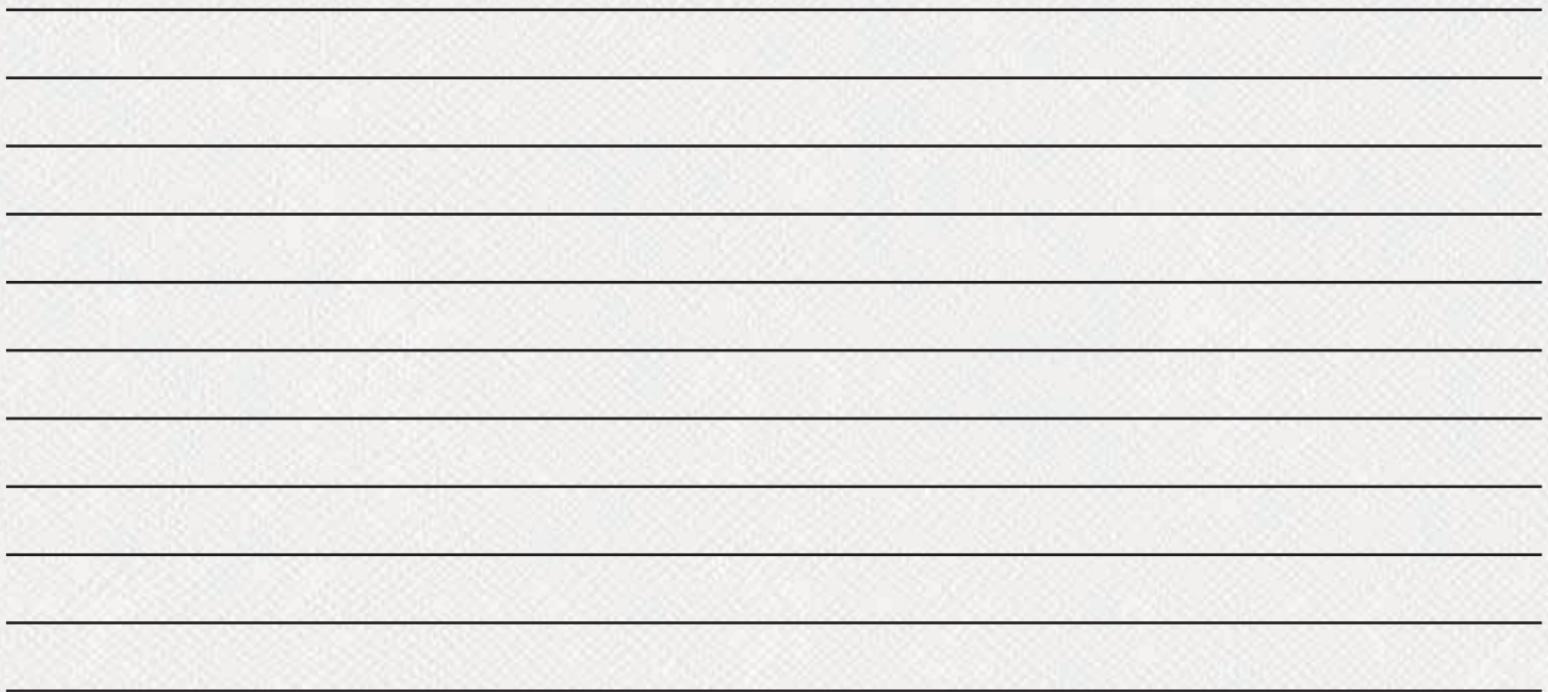

- Available for free on iOS and Android smartphones and tablets.
- Select Ram brand vehicles from model year 2011 to current model year.
- You can also add other Chrysler, Dodge, Jeep, FIAT, or Alfa Romeo vehicles.\*
- Easy access to vehicle information anywhere you go using categories, bookmarks, search and an A-Z index.
- Vehicle information such as operating instructions, maintenance, service history, vehicle controls and emergency procedures.

- Find a dealer or an FCA-certified repair facility.
- Easily document and email an accident report.
- A parking reminder that allows you to drop a pin on your location and navigate back to your vehicle.
- Contact customer care with one click.
- Access to vehicle heritage, parts, accessories, and social media networks.
- Schedule your next service appointment.
- Available in English and Spanish.

\*App supports selected vehicles from model year 2011 to present.

To get this FREE application, go directly to the App Store or Google Play Store and enter the search keyword "RAM TOOLBOX".

**WHETHER IT IS PROVIDING** information about specific product features, taking a tour through your vehicle's heritage, knowing what steps to take following an accident or scheduling your next appointment, we know you will find the app an important extension of your RAM vehicle.

**SIMPLY DOWNLOAD** the app, select your make and model and enjoy the ride. To get this app, go directly to the App Store® or Google Play® Store and enter the search keyword "ram toolbox" (U.S. residents only).

**WWW.RAMTRUCKS.COM/EN/OWNERS** (U.S.) provides special offers tailored to your needs, customized vehicle galleries, personalized service records and more. To get this information, just create an account and check back often.

**GET WARRANTY AND OTHER INFORMATION ONLINE** – you can review and print or download a copy of the Owner's Manual, Navigation/Uconnect manuals and the limited warranties provided by FCA US LLC for your vehicle by visiting **WWW.MOPAR.COM** (U.S.) or **WWW.OWNERS.MOPAR.CA** (Canada). Click on the applicable link in the "Popular Topics" area of the **WWW.MOPAR.COM** (U.S.) or **WWW.OWNERS.MOPAR.CA** (Canada) homepage and follow the instructions to select the applicable year, make and model of your vehicle.

**RAM**

**DOWNLOAD A FREE ELECTRONIC COPY OF THE MOST UP-TO-DATE OWNER'S MANUAL, MEDIA AND WARRANTY BOOKLET BY VISITING:**
